

**TROPICAL CYCLONE BULLETIN NO. 8F**  
**Tropical Depression "GARDO"**  
 Issued at 11:00 AM, 01 September 2022

<b>"GARDO" WEAKENS INTO A REMNANT LOW</b>	
<b>Location of Center (10:00 AM)</b>	
The Low Pressure Area (formerly "GARDO") was estimated based on all available data at <b>760 km East Northeast of Itbayat, Batanes (24.1°N, 128.3°E)</b>	
<b>Intensity</b>	
Central pressure of <b>998 hPa</b>	
<b>Present Movement</b>	
<b>Westward at 35 km/h</b>	

<b>HAZARDS AFFECTING LAND AREAS</b>
The remnant low is unlikely to directly affect the weather condition in the country.
<b>HAZARDS AFFECTING COASTAL WATERS</b>
The remnant low is unlikely to directly affect the sea conditions over the coastal waters of the country.
<b>TRACK AND INTENSITY OUTLOOK</b>
"GARDO" weakens into a remnant low at 8:00 AM today. The circulation of the remnant low will likely to be fully assimilated within the circulation of Super Typhoon HENRY in the next 12 hours.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development occurs, this is the final bulletin for this weather disturbance.
